

January 16, 2018

**Google’s online payment service “Google Pay API”
to join our lineup of “PG Multi-Payment Service” from end of Jan.
-“Google Pay” seminar to be held on Feb. 8-**

GMO-PG will add its online payment service “Google Pay API” to its comprehensive payment service “PG Multi-Payment Service.” This will be launched targeting Ecommerce merchants at the end of January 2018. We will also hold a seminar on “Google Pay” on Thursday, February 8, 2018.

【Overview】

With the release of Google Pay API that enables online payment with a card data registered on Google account, GMO-PG will add Google Pay API to PG Multi-Payment Service, available from the end of January 2018 to ecommerce operators in Japan.

In addition, Google Pay seminar will be held on Thursday, February 8, 2018.

【PG Multi-Payment Service】

PG Multi-Payment Service is a comprehensive payment service that encompasses various payment methods listed below which are not limited to Google Pay API and credit card payment.

It allows merchants to manage multiple payment methods and functions on a central administration screen under standardized closing date and payment receipt date, eliminating the hassle of managing incoming/outgoing payment.

<Major payment methods under PG Multi-Payment Service>

Credit card payment, convenience store payment, carrier billing, e-money billing, cash on delivery, account transfer, PayPal, LINE Pay, multi-currency credit card payment, BitCoin payment, Apple Pay, etc.

【GMO Payment Gateway】

GMO-PG offers comprehensive payment services and financial services to 82,349 merchants (as of September, 2017), including operators of online shops, operators who collect recurring monthly payments such as NHK, and public organizations such as National Tax Agency and Tokyo Metropolitan Government. On top of its core payment-related services, the leading company in Japan's payment space provides value added services such as online advertising service that contributes to boost sales of merchants and a loan service which provides working capital to support merchant growth. Its transaction value has reached over 2.5 trillion yen per annum. The company is also expanding its business portfolio that includes solution business to financial institutions, overseas business based on capital alliances with overseas PSPs or payment companies, etc.

GMO-PG aims to enable both consumers and businesses to enjoy payment methods that are convenient and equipped with high levels of security and to serve as the infrastructure for payment process in Japan. Driving innovations, GMO-PG has and will contribute to promote E-commerce and a cashless society.
